8. Nowadays, Technology is becoming ~~an~~ our support-tools. Technology supports us to do ~~an~~ everything conveniently. In my ~~of~~ opinion, I prefer ~~the~~ statement that in ~~future~~ the future, students may have the choice of studying at home by using technology to the statement that studying at traditional school.

There are some my reasons and examples to support my choice. Firstly, you can save a lot of time if you study at home, you needn't waste time to go to school every day. You have more time to prepare for a good lesson.

Secondly, Computer and television support you to search and find ~~an~~ everything you need, and I ~~don't need~~ needn't go anywhere. When your teacher ~~asked~~ asks you about a thing you don't know, you can search on the Internet.

Thirdly, If student ~~don't~~ haven't to go to school every morning, ~~the~~ the air will become more clean. And the traffic jams won't happen. Student don't go to school late because of traffic jams.

In addition, computer and television help student meet their teacher ~~and~~ easily by a click or video call. Every <sup>one</sup> can contact with another when they is at home.

In short, I ~~am~~ agree with statement that in the future, student may have the choice of studying at home by using technology. For ~~an~~ example, I am taking part in an ~~online~~ online exam easily by my laptop.
